EDUCATION

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE ENGINEERING

MADHAV INSTITUTE OF TECHNOLOGY AND SCIENCE, GWALIOR (M.P.)

XII (CBSE), OXFORD JUNIOR COLLEGE, UJJAIN (M.P.)

X (ICSE), ST THOMAS SCHOOL, UJJAIN (M.P.)

2023-2027 | CGPA: 8.00

2023 | 83.2%

2021 | 81.2%

PROJECTS :

Personal Portfolio: Responsive web portfolio showcasing skills, projects

Wanderlust: Property Listing Website

A dynamic platform for real estate management, allowing property owners to list homes and users to search for properties seamlessly.

- **Technologies:** Node.js, MongoDB, Bootstrap, MVC architecture
- **Features:**
 - Secure user authentication with sign-up and login functionality.
 - Responsive design for smooth experience on all devices using Bootstrap.
 - Interactive and modern user interface.
 - Admin functionality for property owners to list, update, and manage their properties.

MailPlanner: Intelligent Email Scheduler

A platform for efficient email scheduling, content generation, and management with AI integration.

- **Technologies:** Node.js, Nodemailer, Node-Cron, MongoDB, Gemini API
- **Features:**
 - AI-powered email content generation for personalized emails.
 - Allows users to schedule emails for specific dates, times, and recurring intervals.
 - Supports email attachments, including bulk email parsing from attached files like CSV.
 - Secure user authentication for personalized access and scheduling.
 - Integrates with Node-Cron for precise scheduling and execution of emails.

VidConnect: Seamless Video Sharing and Scheduling

A backend-focused platform for efficient video sharing, scheduling, and management

- **Technologies:** Node.js, MongoDB (Pipelines), MVC Architecture, React, Efficient Code Practices
- **Features:**
 - Scheduled video uploads and sharing with secure user authentication.
 - Bulk video management with support for various file formats and efficient data processing using MongoDB pipelines.
 - Robust backend structure following the MVC architecture for scalable and maintainable code.

TECHNICAL SKILLS

- **LANGUAGES:** Java, JavaScript,
- **WEB DEVELOPMENT AND DATABASE:** Node.js, MongoDB, Aggregation Pipelines, MVC model, RESTful APIs, React.js, HTML5, CSS3
- **DEVELOPMENT TOOLS:** Git & GitHub
